- Easy-To-Use Stand-Alone Solution

RFID Tag Reader & Android App

XPressFinder is an RFID-based locating solution that combines a mobile RFID Tag reader with an Android app to quickly locate any missing item from a notebook to high value tools using passive UHF tags in both indoor and outdoor workspaces.

**Pro
Tip**

Any business with important items or valuable assets can benefit from implementing this standalone UHF RFID tagging technology to quickly find them in minutes when they go missing in warehouses or maintenance yards.
